

# Vredo Overseeders

## DZ Compact

### All round

The Compact series is great in its simplicity and can be used on many grounds. With a working width of 1 meter ranging to 2.20 meters, the Vredo Compact can be used in every situation. Camp sites, horse racing circuits, city parks, playing fields, dikes, golf courses and private gardens, etc. visibly get better because of the use of this machine.

This all-rounder has a row distance of 7.5 cm, a disc diameter of 406 mm and is made for rough soil conditions, allowing it to work in all circumstances. The working speed of up to 16 km per hour gives the machine an enormous capacity.

### Accessibility

The fields on which the VREDO Compact is used, often have to remain in use. For example; a campsite can't be closed after its maintenance. A dike or a horse pasture can't be ploughed, because it will lose its function. By overseeding with the Vredo Compact, you will maintain the grass you have and the open spots will be repaired in no time. The grass rejuvenates and weed doesn't get a chance. The fields can be walked upon and mowed right away. After all, the grass

seed is perfectly closed in the narrow slit. Green while you are waiting.

### Unique features

The Vredo Compact offers variable seed dosage, so there is never too much or too little released. The user is able to determine the amount of seed, with the help of the practical designed spindle and seed chart, which is equipped with the most common types of grass and mixtures. The seed gets regulated precisely, through the cam wheel and the bottom flap, from the beginning until the end in all its movements.

Since the soil conditions and environmental factors like wind and sun are unique, the required grass care is as well, every turf requires its own specific adjustment. With the Vredo Compact this is child's play. With the use of the calibration tray and the extensive seed chart the dosing is exact and very easily adjustable. With the building of this robust machine high quality materials have been used, which makes this machine an investment for life.

### VREDO double disc principal

**Vredo Compact; "Relax, everything will be green again!"**

The best in the Field

### Standard new features

- A Spindle**  
To adjust the quantity of seed released by the machine. With use of the seed chart at the inner side of the lid, this is an easy job.
- B Gas cylinder**  
To open and close the lid smoothly after filling the seed tank.
- C LED lights**  
Bright light with clear signs of direction and brakes for transport on the road.

### Options

- 1 Platform**  
Stable metal standing platform for easy and safe filling of the machine.
- 2 Second hectare counter**  
Ideal for machines who will be rented out. Registers the number of hectares precisely, without the user being able to influence it.
